Module	**COR Electronic Acceptance of Shipments by Fiscal Year Cube**
Lesson One	**About the Electronic Acceptance of Shipments by Fiscal Year Cube**
Topic One	About the Electronic Acceptance of Shipments by Fiscal Year Cube
Topic Two	Dimensions and Measures
Topic Three	Default Cube View

Course Objectives

At the end of this training you should be able to:

- Use the COR Electronic Acceptance of Shipments by Fiscal Year cube to see the data you need in the cube view and drill-through report
- Understand who can see the cube
- Plan for the frequency of data refreshes for the cube
- Understand the measures, dimensions, and filtering options available for the cube

Topic Three	Default Cube View

About the COR Electronic Acceptance of Shipments by Fiscal Year Cube

- This cube provides summarized data to support the identification of trends in the use of WAWF to process Shipments from the perspectives of CMO, ACO, Supplier, Service, Buying Activity, Type of Shipment, and Processing Date.
- Available to both DCMA internal users as well as external users
- Allows customers to query Contract Payment and Contract Administration information
- Data refresh occurs on the 1st of each month

About the COR Electronic Acceptance of Shipments by Fiscal Year Cube

What are cubes?

Cubes allow you to select organizational data to see a high-level overview, a drilled down detailed review, and intermediate levels. This shows trends over time.

Cubes show:

Measures: The way you want to quantify the data, defined as a percent or a count. The selected measure appears in the upper left cell of the cube view.

Examples: Number of Shipments, Percent of WAWF Shipments, Number of Electronic Shipments

Dimensions: The data that you are measuring. The dimensions appear in the columns and rows of the cube view.

Examples: Admin Organizations, Services, Process Date

Topic Two – Dimensions and Measur

Dimensions and Measures for the COR Electronic Acceptance by Number of WAWF Shipments Cube

Dimensions	Service (default selection for rows) Sustainment Customers Data Load Date (shows how current the information is) Process Date (default selection for columns) Strategic Suppliers Shipment Type Admin Organization
Measures	Number of Shipments Number of Electronic Shipments (default selection) Percent of Electronic Shipments Percent of WAWF Shipments Number of Paper Shipments Percent of Paper Shipments

Module – Review

Module Covered the Following Topics:

Topic One	About the COR Electronic Acceptance of Shipments by Fiscal Year Cube
Topic Two	Dimensions and Measures
Topic Three	Default Cube View

Course Objectives

Now that you have completed this training, you should be able to:

- Use the COR Electronic Acceptance of Shipments by Fiscal Year cube to see the data you need in the cube view and drill-through report
- Understand who can see the cube
- Plan for the frequency of data refreshes for the cube
- Understand the measures, dimensions, and filtering options available for the cube
- Use the COR Electronic Acceptance of Shipments by Fiscal Year cube to see the data you need in the cube view and drill-through report
